

HOW TO ADMINISTER NARCAN (naloxone)

5 STEPS

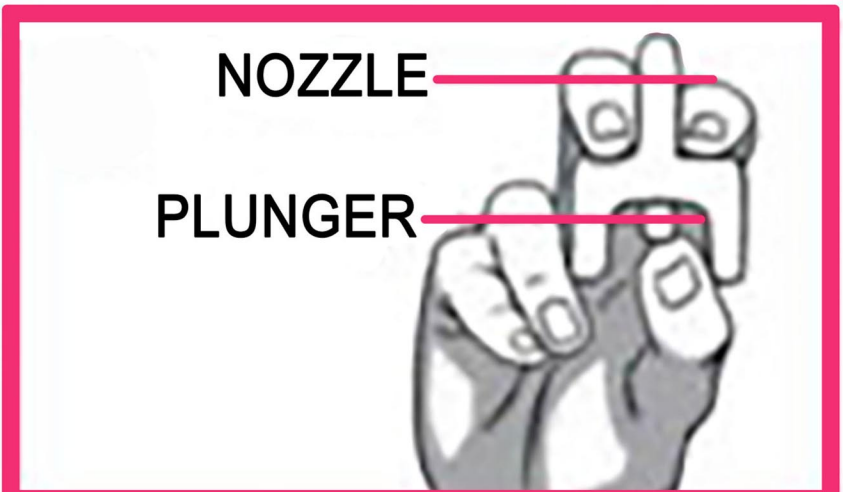

1. Remove NARCAN/Naloxone spray from the box
2. Peel Back the tab with the circle to open (Do NOT test...one does per bottle)
3. Place your thumb on the bottom and your middle/index fingers on either side of the top
4. Tilt the persons head back and support the under the neck with your hand
5. Insert entirely into the nostril and press plunger to administer the full does (3-5 minutes to work)

Administer a second dose of NARCAN/Naloxone if:

- a.** If there is no breathing after 2-3 minutes
- b.** If the person stops breathing again
